
Saint Claud to La Grange Du Lac at Le Lac De Saint Mathieu

We will make two brief stops en route. Stop 1 will be at Point 8, Rochechouart where we can have a quick wander around the courtyard of the castle. Parking to the right of the Mairie under the trees, if full in the road to the left of the Mairie. After leaving Rochechouart as the route climbs, we will pass a lake on the left. This is where an asteroid crashed into the earth over 200 million years ago. The Romans used the fused rock generated by the impact to build their baths at Chassenon. Stop 2 will be at Chéronnac where we will inspect the source of the Charente. The spring is near the road, park where you can.
